

# MEDICATION HISTORY

Imagine having access to a complete list of your patient's prescribed medications along with the dispensed history to assist with more informed patient assessments. BSCC Medication History, provided through our partnership with DrFirst, is powered by complete, clean, concise, and consumable medication data. By utilizing this service, providers will have insight into their patients' compliance and enable the patient care team to efficiently coordinate transitions of care properly and reduce preventable treatment errors.

## Benefits:

- Support more informed care decisions
- Facilitate efficient and complete medication reconciliation process
- Reduce adverse drug events
- Improve medication adherence
- Access real-time medication information, history, and adherence (prior authorizations)
- Reduce number of potential adverse drug events, adverse drug events account for:
  - 4.7% of hospital admissions
  - 26% of hospital readmissions
  - \$1 million per hospital per year in costs estimated
- Identify up to 25% more medications
- Improve accuracy of prescribing information

The BSCC Medication History provides prescribed, dispensed, and medication history data. Medication History will be populated from contributing entities including pharmacies, provider, payors, and other connected BSCC participants and partners with prescription, dispense, and refill history.

**Prioritize** most complete medication record

**De-duplicate** medications across multiple sources

**Group** multiple fills

**Data** is complete, clean, consumable
